

Chemwatch FACT SHEET

GOLDFFX: COMPLETE CHEMICALS MANAGEMENT

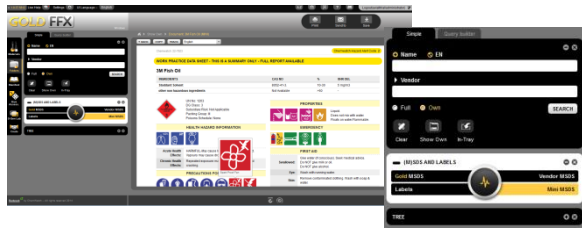

IN A NUTSHELL

Hazardous Substances Management and Inventory

SDS Authoring, Management and Updating

Labelling and Emergency Documentation

Training and Reporting

Chemicals Management		Services Expertise	
Inventory	Manage your chemical assets and create compliant chemical registers.	Emergency Response	Information for your chemical incidents: 24/7 Emergency Hotline available in 150 languages.
Documentation	Available documentation includes: Vendor SDS, Gold SDS, Mini SDS, Emergency documents (first aid, spills, firefighting advice) and more.	Regulatory Expertise	A team of experts to assist with chemical importing and exporting questions. They maintain the world's largest regulatory database which influences GoldFFX: Over 1.6 million chemicals from 8,000 chemical families in 6,500 lists from 90 countries.
SDS Updating and Management	SDS sourced and updated, plus software solutions for your SDS management. The Chemwatch database contains 30 million+ Vendor SDS and 350,000 Gold SDS. Comparison reports provided for updated SDS.	ERP/Systems Integration	Web Service API integration, utilising some of the data usually available in GoldFFX, available out-of-the-box. Chemwatch API has been used to integrate with SAP, Oracle JDE, online stores, websites, and custom systems. REST and .NET SOAP interface with WDSL are available.
Reporting	Export SDS and chemical data. Advanced and ingredient reporting, system dashboards, chemical querying/tagging based on regulations also available.	System Security	Extensive security permissions available based on user, role and location.
Labelling	Software pre-loaded with chemical label templates for various countries. Ability to design dynamic labels, plus auto-fill function for chemical information. Multi-lingual label support.	Training	SCORM-compliant eLearning available. Customised or standard packages cover topics like Chemwatch system use, or how to comply with local regulatory requirements (including GHS).
Risk Assessment	Systemised internationally adopted model (UN ILO) provides full Risk Assessment scenarios; tasks, jobs and controls. Risk Ratings configurable by the user. Default control measures also calculated.	Data Management	Cloud based systems, hosted on Amazon Web Services. Security is paramount, with code reviewed by VeraCode.
Master Chemical Data	Master (Gold) data is maintained by a team of 170 experts including chemist, toxicologists, hygienists, regulatory experts, OHS specialists, and physicians.	Global Presence	Offices in 23 countries. Systems in 47 languages for 100+ countries.

RELATED PRODUCTS AND SERVICES
